

Adobe Creative Cloud Express and Google for Education

Adobe Creative Cloud Express for Education is the free web and mobile solution that enables teachers, and students of all ages to easily create impactful visual stories in the form of graphics, web pages, videos, and more. With features enhancing data privacy, safe image search, and sharing restrictions, students and teachers can design in a safe, child-friendly environment.

Create in powerful formats:

Graphics—Create stunning graphics and collages for posters, book covers, and math explanations.

Web pages and presentations—Build essays, reports, extracurricular and club pages, and newsletters.

Short videos—Make narrated videos for class presentations, book reports, and group projects.

Creative Cloud Express seamlessly integrates with Google for Education products and tools.

Designed for Chromebooks

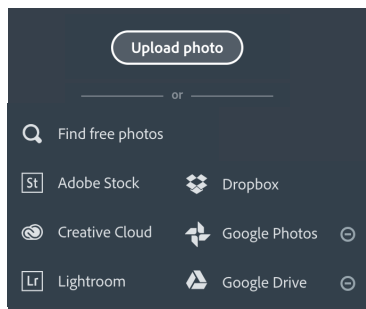

Creative Cloud Express runs in a web browser on any desktop or laptop. It's also been optimized to run on Chromebooks via the Chrome web browser. There's nothing to install—just have students go to <https://www.adobe.com/education/express/> and log in.

Easy student login

Use your existing Google username and password to log in to Creative Cloud Express. The app connects to your existing Google Workspace for Education accounts, so your students can log in with the same credentials they already use.

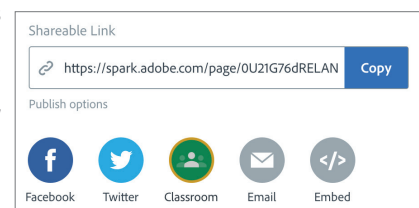

Quick access to Google Drive and Photos

To create great work, students need access to their own photos, graphics, and more. Creative Cloud Express offers built-in support for Google Drive and Google Photos so students' assets are just a click away.

Google Classroom support

Using Google Classroom to manage student assignments? Creative Cloud Express features integrated Google Classroom sharing to make it easy for students to submit their finished work.

Creative Cloud Express for Education is free for K-12 schools and districts. Learn more at <https://www.adobe.com/education/express/>
