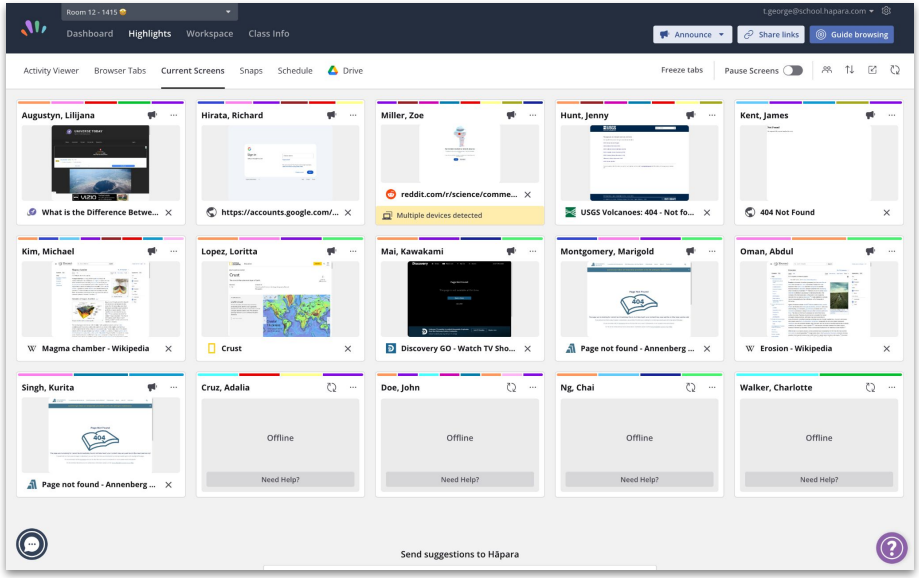
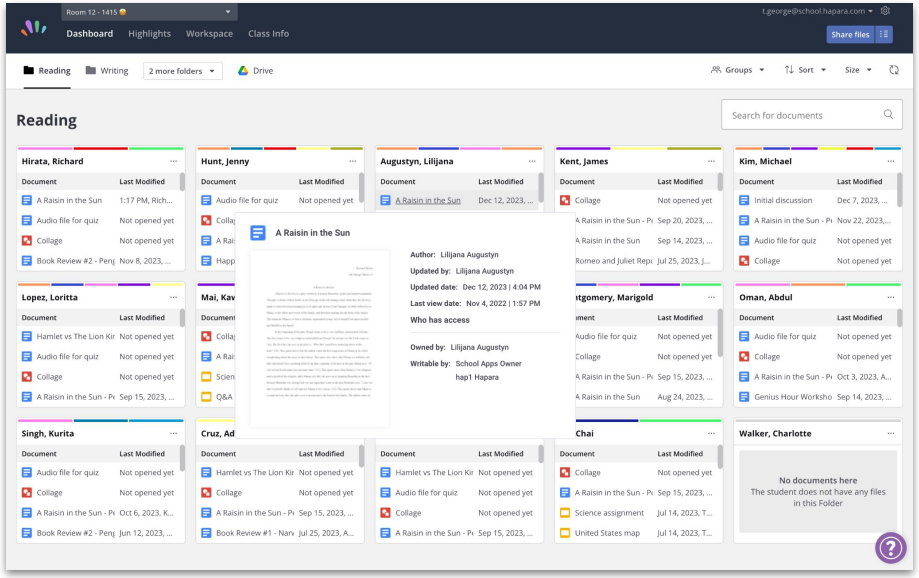
HĀPARA CLASSROOM MANAGEMENT

An all-in-one solution of student-centered tools that helps schools create safe, supportive and focused digital learning environments where learners can become true digital citizens.





Highlights

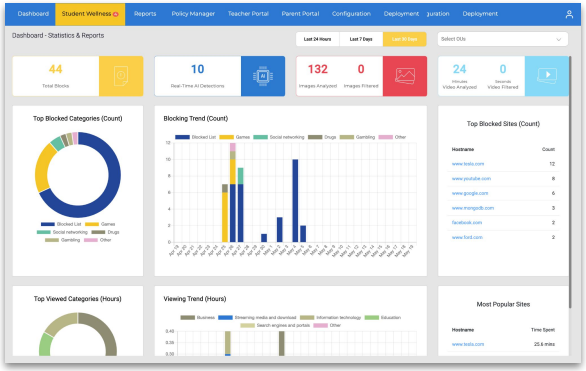
A Chrome browser monitoring tool to facilitate learning and instill digital citizenship by enabling educators to view, guide and focus online activities at the individual, group and classroom level.

Teacher Dashboard

A central hub that allows teachers to view and access learner work, and efficiently provide timely and consistent formative feedback.

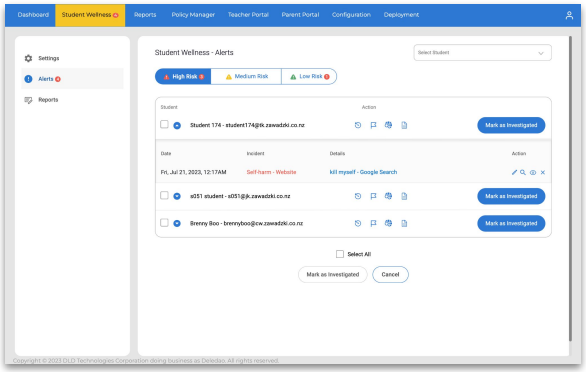
HĀPARA CLASSROOM MANAGEMENT

An all-in-one solution of student-centered tools that helps schools create safe, supportive and focused digital learning environments where learners can become true digital citizens.



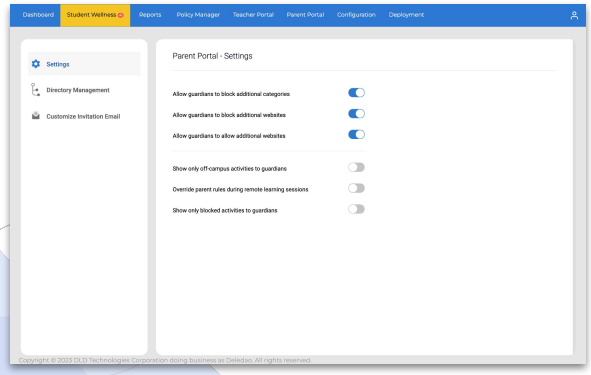
Deledao ActiveScan, presented by Hāpara

Real-time web filtering of video, image and text powered by artificial intelligence, reducing the need to constantly maintain allowed and blocked lists. Anonymizes Google searches, blocks ads and gives teachers the power to approve websites on a case-by-case basis. Wellness monitoring across all online activity with real-time alerts that helps schools create a safe and supportive digital environment.



Deledao ActivePulse, presented by Hāpara

Deledao ActivePulse, presented by Hāpara scans learners' web browsing, Google Drives and Gmail and sends mental wellness alerts instantly. Route email or text alerts to different team members based on the risk level and the learner's organizational unit.



Parent Portal

Allow parents to set internet rules at home for school-issued devices and monitor their child's online activity. And you don't have to spend time approving websites one by one across your school district. Learning can continue seamlessly without downtime as students research and work on assignments online.

"Because everything in Hāpara works with Google Classroom and Google Drive, I am able to embed my own carefully created and curated resources easily, and automate many of the tasks that used to take up all my instructional time. This frees me up to spend most of my time supporting students one on one, which is really what teaching is all about."

Rebecca Recco
Art Teacher, Oakland Public Schools
Oakland, California

Hāpara

A comprehensive AI web filter that's easy to manage

Deledao ActiveScan, presented by Hāpara is the only tool that understands context in real-time across digital learning. With quick installation, award-winning data privacy, a focus on student wellness and management options for teachers, it's the best solution for admins.

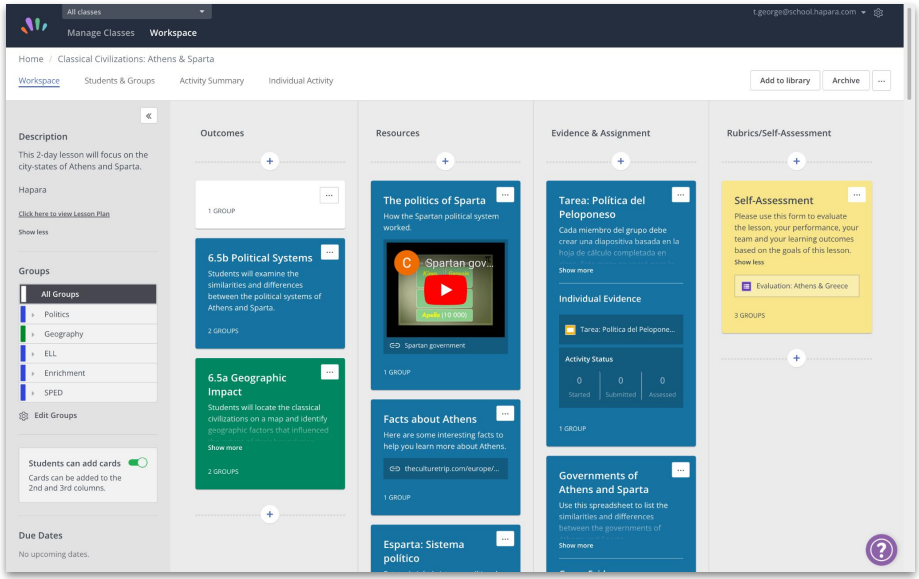
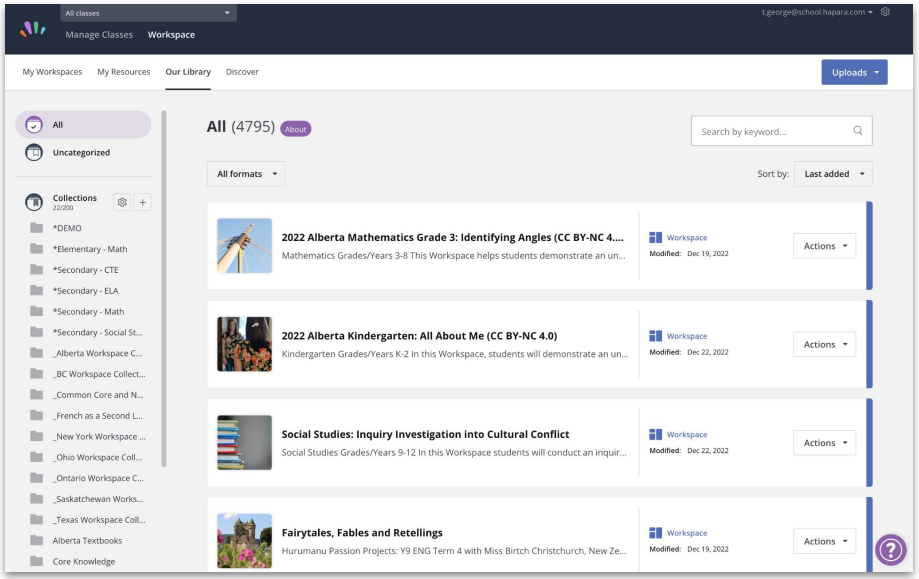
HĀPARA INSTRUCTIONAL MANAGEMENT

Implement the pedagogical shift that transforms learning.





Workspace

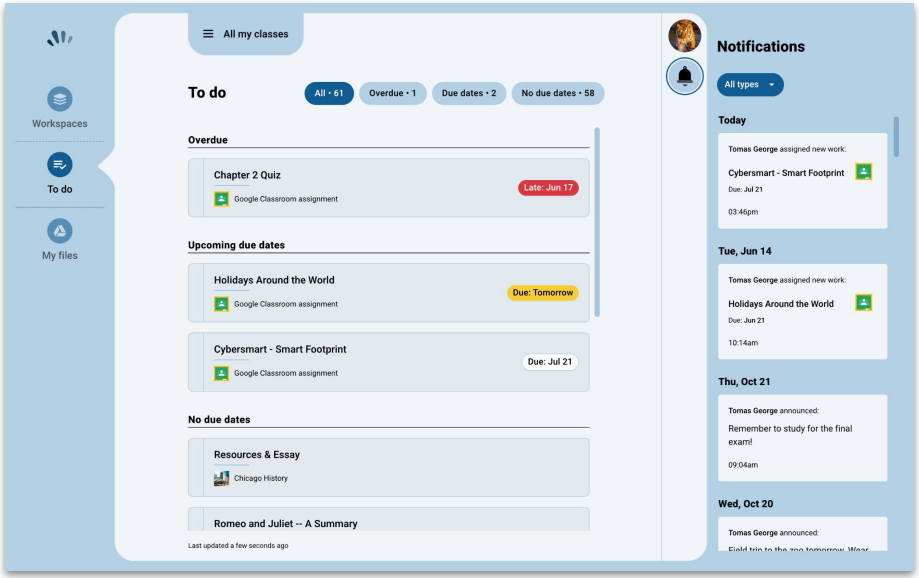
A powerful platform that simplifies the creation of differentiated and personalized lessons. It enhances the LMS or Google Classroom experience for teachers and students with tools that facilitate the equitable delivery of instruction to provide students with learning experiences that meet their individual needs. Additionally, Workspace provides access to thousands of curriculum-aligned lessons and resources that can be used in the classroom or at home.

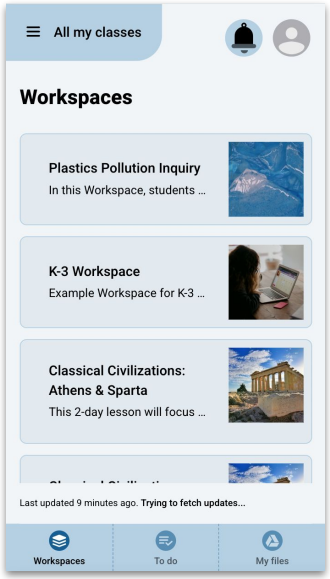
Workspace Private Library

Make Workspace collections accessible to only members of the same school or district to protect licensed and proprietary content.

HĀPARA INSTRUCTIONAL MANAGEMENT

Drive student agency and streamline their Google Classroom experience.





Student Dashboard

A one-stop, mobile-friendly location where learners can access Google Classroom, Google Drive and Hāpara Workspace. A less stressful way for students to manage their workflows, develop crucial executive function skills and do more learning.

Instructional management tools

The Hāpara Instructional Suite makes differentiation and personalization for every learner possible.

“We use Hāpara district wide to reduce costs as well as expand our course offerings in cohort models remote, blended, and face-to-face in schools.”

Bob Allen
Superintendent, Buffalo Trail Public Schools
Alberta, Canada

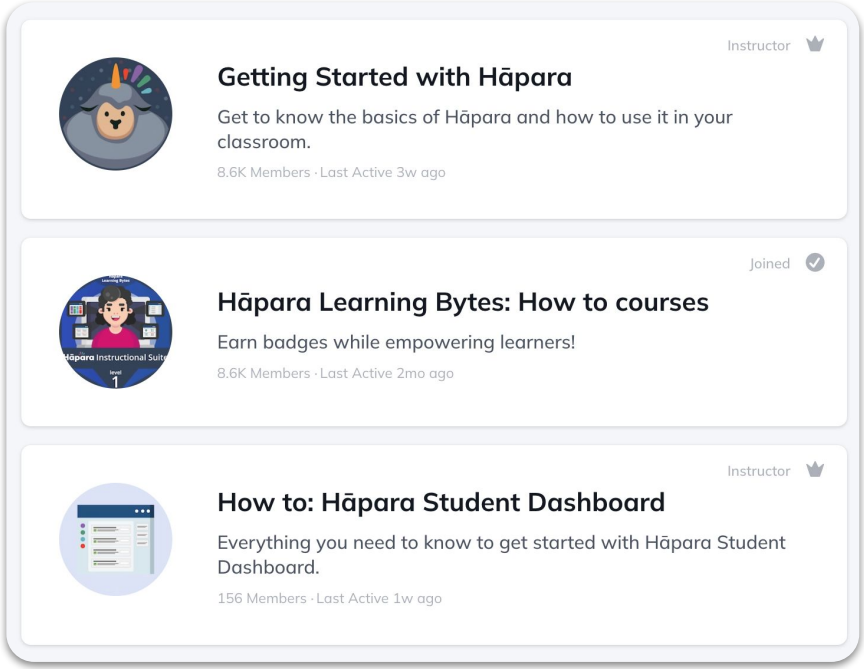
Hāpara

Ensure the success of your Hāpara rollout

Professional Learning

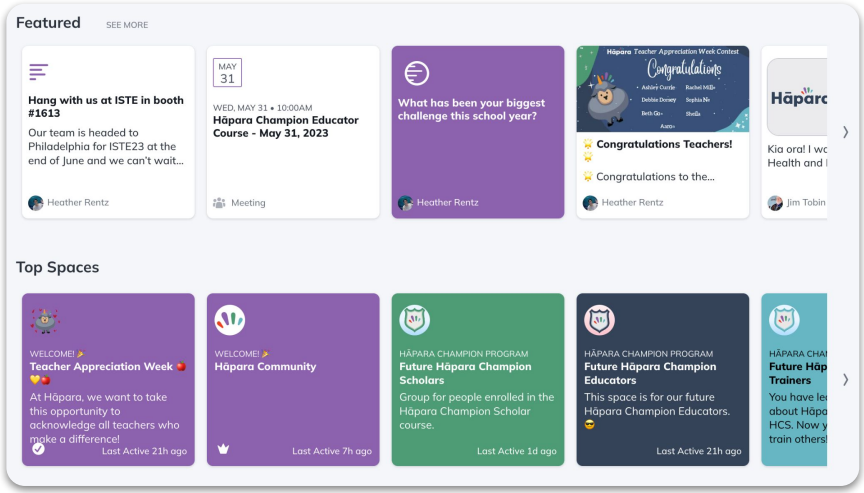
A variety of professional learning offerings tailored to your teachers' needs:

- Hāpara Learning Bytes micro-credentialing program: Short, self-service courses that can be completed in about an hour giving teachers the ability to get up and running quickly with Hāpara.
- Hāpara Champion certification programs: A deeper dive into Hāpara and the pedagogy that it is based on. Educators complete the course asynchronously and a Hāpara facilitator provides feedback and guidance along the way.
- A dedicated Engagement Manager that will work with you to identify areas for improvement and provide training resources.
- Customized, onsite professional learning from one of our expert Hāpara Champion Trainers (additional fee).



The Hāpara Community

Access to our global community of thousands of educators for networking, learning, free resources and sharing ideas!



FAQs about technical implementation

1. Do I have to have a Google Workspace Domain?
Yes. You must have a Google Workspace domain to use the Hāpara solution. This can be a Google Workspace domain or a Google Workspace for Education domain.

2. What if we run Google Cloud Directory Sync (GCDS)?
GCDS is compatible with the Hāpara solution, but you will need to create some exception rules for a few groups, and possibly for password sync. Our awesome Implementation team will help you with that.

3. Do I need to build groups, organization units (OU's) or subdomains?
No. You don't need to create any new groups, OUs or sub-domains. We create Google groups for students, classes and TD users. However, organizational units are generally good practice for Google domains so that policies and settings can be compartmentalized.

4. What if all of our students are in a sub-domain and teachers are in the main domain or vice versa? What about entirely separate domains?
Not a problem at all. This is entirely compatible with the Hāpara solution. The connection will happen with the domain in which the students reside.

5. Does Hāpara offer a filtering solution?
Yes! Learn more about Deledao ActiveScan, presented by Hāpara powered by artificial intelligence.

6. What personally identifiable information (PII) do you collect, and what do you do with it?
We collect the emails and names of teachers and students. This information remains on our servers as long as you are a subscriber. We also collect screenshots and browser addresses upon the teacher's request. These are purged from our system on a weekly basis. All other information that Hāpara accesses is ephemeral.

7. How do teachers/students log into Hāpara?
Teachers log into Hāpara through their school Google account. Students log in the same way.

8. Do students need to have Gmail access?
No. They just need to have Google accounts; Gmail can be disabled.

9. How are class and student rosters created?
Hāpara has various ways of syncing data, either through direct integration with your SIS (Clever,Powerschool, Classlink) or syncing classes using Google Classroom. Classes can also be created manually through the dashboard.
